

About us

Angel Bank provides a direct way to connect businesses with capital.

Our network of business angels are constantly on the hunt for the best investment opportunities – possibly even the next Google or Microsoft…

Our target for 2008 is to profile 600 to 800 businesses here at Angel Bank, along with expanding our database of business angel investors to over 1,500.

Aside from business angel funding, we help companies to access venture capital sources, along with a variety of debt finance options.

"We have found the service to be superbly professional. Their expertise has helped our project immensely." Alan Lawson
